

Leakage-controlled closed-vocabulary fragment replacement ranking

A One query, many candidates

side note
closed train-derived vocabulary
no open-vocabulary generation

Top-10 hit if any true replacement appears in window

B Random split leakage

	Train examples	Evaluation examples
Transform identity	T_1	T_2
	T_2	T_2
	T_3	T_5

Shared transform identity across train/test
→ leakage risk

C Transform-heldout protocol

	Train transforms	Blind transforms
Transform identity	T_1	U_1
	T_2	U_2
	T_3	U_3

Zero (old fragment, attachment signature) overlap

Secondary blind = primary evaluation
